

Global Marketing Communication

Global Marketing Communications

- The primary purpose of marketing communications is to tell customers about the benefits and values that a company, product, or service offers
- Integrated Marketing Communications (IMC) is becoming more popular because of the challenges of communicating across national borders

Global Advertising

- Advertising is any sponsored, paid message that is communicated in a non-personal way
 - Single country
 - Regional
 - Global
- Global advertising is the use of the same advertising appeals, messages, art, copy, photographs, stories, and video segments in multiple country markets

Standardization vs. Adaptation

- Primary Question
 - Must the specific advertising message and media strategy be changed from region to region or country to country?

Standardization vs. Adaptation

- Four difficulties that compromise an organization's communication efforts
 - The message may not get through to the intended recipient.
 - The message may reach the target audience but may not be understood or may even be misunderstood.
 - The message may reach the target audience and may be understood but still may not induce the recipient to take the action desired by the sender.
 - The effectiveness of the message can be impaired by *noise*.

Standardization vs. Adaptation

“Eighteen-year olds in Paris have more in common with 18-year-olds in New York than with their own parents. They buy the same products, go to the same movies, listen to the same music, sip the same colas. Global advertising merely works on that premise.”

- William Roedy, Director, MTV Europe

Creating Global Advertising

- Creative strategy
- Big idea
- Advertising appeal
 - Rational approach
 - Emotional approach
- Selling proposition
- Creative execution
 - Art & Copy

Global Media Decisions

- Prepare new copy for foreign markets in host country's language
- Translate the original copy into target language
- Leave some or all copy elements in home country language

Media Decisions – Saudi Arabia

- Use of comparative advertising claims is prohibited
- Non-censored films cannot be advertised
- Women may only appear in those commercials that relate to family affairs, and their appearance must be in a decent manner that ensures feminine dignity
- Women must wear a long suitable dress which fully covers her body except face and palms

Public Relations and Publicity

- Fosters goodwill and understanding
- Generates favorable publicity
- Tools
 - News releases
 - Media kits
 - Press conferences
 - Tours
 - Articles in trade and professional journals
 - TV and radio talk show appearances
 - Special events

The Growing Role of Public Relations in Global Marketing

- Public Relations expenditures are growing at an average of 20% per year
- In India they are reported to be growing by 200% annually
- Reasons for the growth
 - Increased governmental relations between countries
 - Technology
 - Societal issues in the environment

Public Relations Practices around the World

- Public relations practices can be affected by:
 - Cultural traditions
 - Social and political contexts
 - Economic environments
- Public relations professionals must understand these differences and tailor the message appropriately

Sales Promotion

- Sales promotion refers to any paid consumer or trade communication program of limited duration that adds tangible value to a product or brand
 - Price vs. non-price promotions
 - Consumer vs. trade promotions

© 2005 Prentice Hall

14-13

Sales Promotion: Global or Local

- In countries with low levels of economic development, low incomes limit the range of promotional tools available
- Market maturity can also be different from country to country
- Local perceptions of a particular promotional tool or program can vary
- Local regulations may rule out use of a particular promotion in certain countries
- Trade structure in the retailing industry can affect the use of sales promotions.

© 2005 Prentice Hall

14-14

Sampling

- Sampling
 - Provides consumer with opportunity to try product at no cost
 - May be distributed in stores, in the mail, through print media, at events, or door-to-door

© 2005 Prentice Hall

14-15

Coupons

- Coupons
 - Printed certificates entitle the bearer to a price reduction or some other special consideration for purchasing a particular product
- Couponing accounts for 70% of consumer promotion spending in the US

© 2005 Prentice Hall

14-16

Sales Promotion: Issues and Problems

- Fraud
- Regulations vary by country
- Cultural dispositions to coupons and other sales promotions
 - Malaysians see coupon usage as embarrassing
 - Islam frowns on gambling so sweepstakes may not work

Personal Selling

- Person-to-person communication between a company representative and potential buyers
- Focus is to inform and persuade prospect
- Short-term goal: make a sale
- Long-term goal: build relationship

Personal Selling Hurdles

- Political Risks – unstable or corrupt governments change the rules for the sales team
- Regulatory Hurdles – Governments can set up quotas or tariffs that affect the sales force
- Currency Fluctuations – increase and decrease in local currencies can make certain products unaffordable
- Market Unknowns – lack of knowledge of market conditions, the accepted way of doing business, or positioning of the product may derail the sales team's efforts

Special Forms of Marketing Communications

- Direct Marketing
 - Direct mail
 - Catalogs
 - Infomercials, Teleshopping
- Event Sponsorship
 - Concerts, sports events
 - Product placement in movies
- Internet Communications

Direct Marketing

- Any communication with a consumer or business recipient that is designed to generate a response in the form of:
 - An order
 - Request for further information
 - A visit to a store or other place of business

Mass Marketing

- Communication that is typically aimed at broad segments of consumers with certain demographic, psychographic, or behavioral characteristics

Direct Marketing vs. Mass Marketing

Direct Marketing	Mass Marketing
Marketer adds value (creates place utility) by arranging for delivery of product to customer's door.	Product benefits do not typically include delivery to customer's door.
Marketer controls the product all the way through to delivery.	Marketer typically loses control as product is turned over to distribution channel intermediaries.
Direct response advertising is used to generate an immediate inquiry or order.	Advertising is used for cumulative effect over time to build image, awareness, loyalty, and benefit recall. Purchase action is deferred.
Repetition is used within the ad or offer.	Repetition is used over a period of time.
Customer perceives higher risk because product is bought unseen. Recourse may be viewed as distant or inconvenient	Customer perceives less risk due to direct contact with product. Recourse is viewed as less distant.

One-to-One Marketing

- Building from Customer Relationship Management
 - Identify customers and accumulate detailed information about them
 - Differentiate customers and rank them in terms of their value to the company
 - Interact with customers and develop more cost efficient and effective forms of interaction
 - Customize the product/service offered to the customer

Catalogs

- A magazine style publication that features photographs and extensive information about a company's products

Learning Outcomes

At the end of the lesson, students should be able to,

- ✓ 1) Identify an overview of the World Economy
- ✓ 2) Explain Economic Systems in the world
- ✓ 3) Describe the stages of Market Development and its marketing implications
- ✓ 4) Explain the components of International Finance
- ✓ 5) Explain Economic Integration and International trade alliances

1) World economy – An Overview

After WWII, most fundamental change is the emergence of global markets.

1) Capital movement rather than trade have become the driving force of the world economy.

2) Production has become uncoupled from employment.

1) World economy – An Overview

After WWII, most fundamental change is the emergence of global markets.

3) The world economy dominates the scene. The macroeconomics of individual countries no longer control economic outcomes.

4) The growth of e-commerce via the internet diminishes the importance of national barriers.

2) Economic systems

- There are 3 types of economic systems;
 - Capitalist
 - Socialist
 - Mixed
- This classification is based on the dominant method of resource allocation;
 - ✓ Market allocation
 - ✓ Command/ Central plan allocation
 - ✓ Mixed allocation

Capitalist Economic System

- This economic system uses Market allocation (Price Mechanism)
- Relies upon consumers to allocate resources (Consumers decide what goods they desire and firms determine how much of those goods to produce)
- Role of the state – Promote competition, Ensure consumer protection
- E.g. United States, Japan

Socialist Economic System

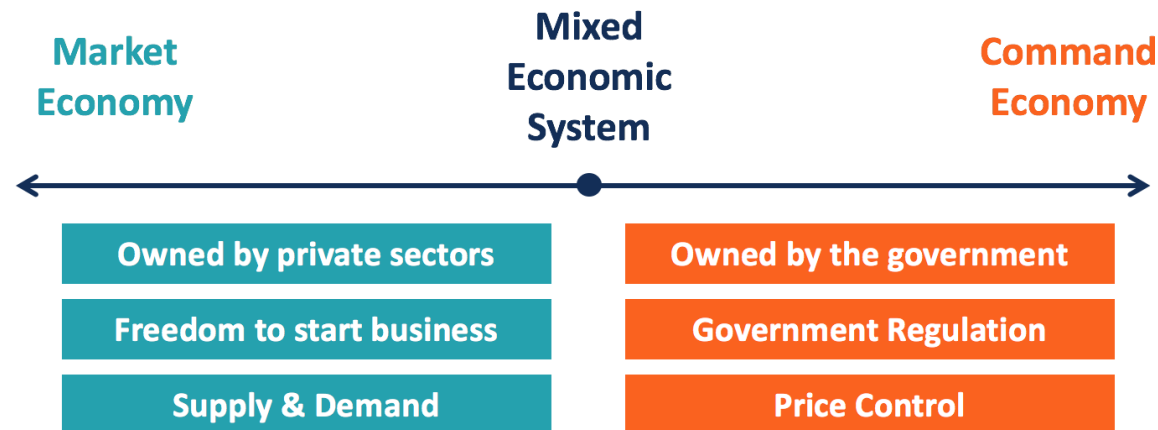

- Command allocation – Government has the power to serve the public interest.
- Consumers are free to spend money on what is available. But the decisions on what is produced and what is available are made by the state planners.
- Little focus on the marketing mix.
- Little reliance on product differentiation, advertising to eliminate “exploitation” by intermediaries.
- E.g. China, Former Soviet Union and India (now engaged in economic reforms)

Mixed Economic System

- In reality, there are no pure market or command allocation systems among the world's economies.

Classification of Economies based on degree of Economic Freedom

- Based on Heritage Foundation, degree of economic freedom is based on key economic variables such as taxation policy, monetary policy, property rights, regulations etc.

https://static.heritage.org/index/pdf/2025/2025_indexofeconomicfreedom_humanflourishing.pdf

3) Stages of Market Development

- World Bank has developed a four category classification that uses Gross National Income (GNI) as a base.
- Categories are;
 - Low Income countries
 - Lower Middle Income countries
 - Upper Middle Income countries
 - High Income countries

Low Income Countries

- Income/ GNI per capita of \$1,135 or less
- Limited industrialization, High percentage of employees engaged in agriculture
- High birth rates, short life expectancy
- Low literacy rates
- Heavy reliance on foreign aid
- Political instability and unrest
- Eg: Afghanistan, Ethiopia, Haiti

Lower Middle Income Countries

- Countries with GNP per capita between \$1,136 and \$4,495
 - Produce standardized, mature labor intensive products
 - Consumer markets are expanding
 - Eg: India, Nigeria, Vietnam, Philippines, SL
-
- https://datahelpdesk.worldbank.org/knowledgebase/articles/906519-world-bank-country-and-lending-groups?utm_source=chatgpt.com

Upper Middle Income Countries

- GNP per capita between \$4,496 and \$13,935
- Percentage of population involved in agriculture is dropping sharply as people are moving to industrial sector.
- Degree of urbanization increases.
- They experience rapid, export-driven economic growth.
- Eg: China, Thailand, China, South Africa, Brazil, Turkey, SL

<https://www.youtube.com/watch?v=v9kJMF2PqZM>

High Income Countries

- GNP per capita above \$13,935 or more
- They have reached the present income level through a process of sustained economic growth.
- Dominance of service sector in the economy.
- Knowledge is considered as the key strategic resource over capital.
- Intellectual technology over machine technology.
- Eg: Norway, New Zealand, Canada, USA, Germany, Japan, Singapore

Marketing Implications of the Stages of Development

- These stages are useful in global market segmentation and target marketing
- This serve as a guide to marketers in evaluating **product saturation levels** or the percentage of potential buyers that own a particular product.

Eg: In china, saturation levels of private motor vehicles is 1 car for every 43,000 chineese (Low levels of vehicle ownership means an attractive oppprtunity for global automakers)

4) Balance of Payment

- Record of all economic transactions between the residents of a country and the rest of the world
 - Current account—record of all recurring trade in merchandise and services, and humanitarian aid
 - trade deficit—negative current account
 - trade surplus—positive current account
 - Capital account—record of all long-term direct investment, portfolio investment, and capital flows

Significance of Balance of Payment for the world major economies

- Imbalances in BOP
- If a surplus in overall BOP Balance – A country will accumulate the reserves
- If a deficit in overall BOP Balance - Give up reserves
- US has a deficit in the current account since US trade deficit reflects increasing imports from China for consumer goods, Costs for military operations in ME and Afghanistan But, US has a surplus in services (inflow of capital through American express, Walt Disney, IBM, Microsoft etc.) to balance off the trade deficit- US owns more foreign products
- Meanwhile, China offset its trade surplus with outflow of capital – China owns more US Land, Real estate and government securities

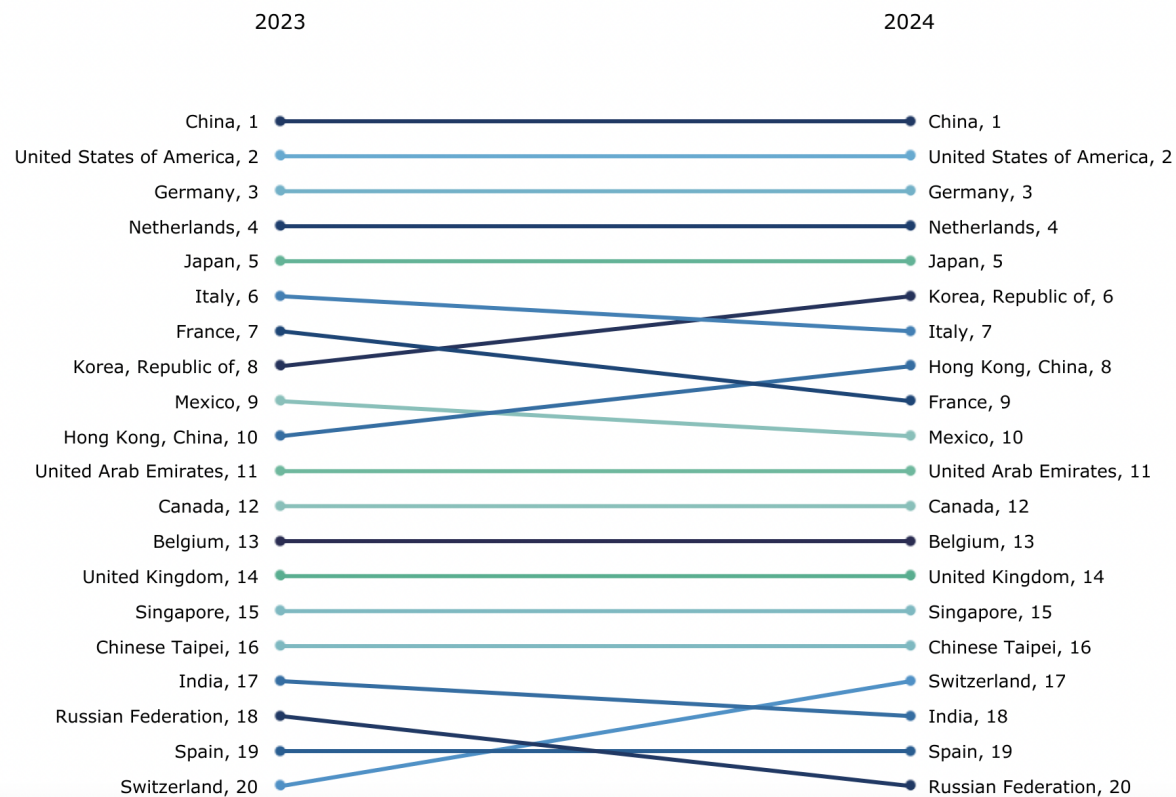

Trade Patterns

Merchandise Trade

- Since end of World War 2, world merchandise trade has grown faster than world production.
- Since 1983, Foreign Direct Investment has grown five times faster than world trade and 10 times faster than GNP.
- 75% of world exports generated by industrialized countries.
- 25% generated by developing countries.
- The COVID-19 pandemic led merchandise trade to decline by 8 per cent in 2020

Services Trade

- Fastest growing sector of world trade.
- Include Travel & Entertainment, Education, Business services such as Engineering, Accounting and Legal services
- The COVID-19 pandemic led to commercial services contracting by 21 per cent in 2020.(lockdowns led to the cancellation of flights, holidays abroad, restaurant meals, and cultural/recreational activities)

World's leading

Overview of International Finance

- One major aspect of Global marketing involves Exchange rate risk (Due to different currencies whereas no exchange risks involves for a domestic marketer)
- Revaluation and devaluation of currency will affect global companies in terms of cost advantages or disadvantages

Eg: China revaluation led global automakers such as BMW, General Motors that assemble cars in China from imported parts to reap the benefits of lower costs.

How to find whether a currency is undervalued or overvalued?

Currency value can be reflected from a global product – The Big Mac Index

The Big Mac Index

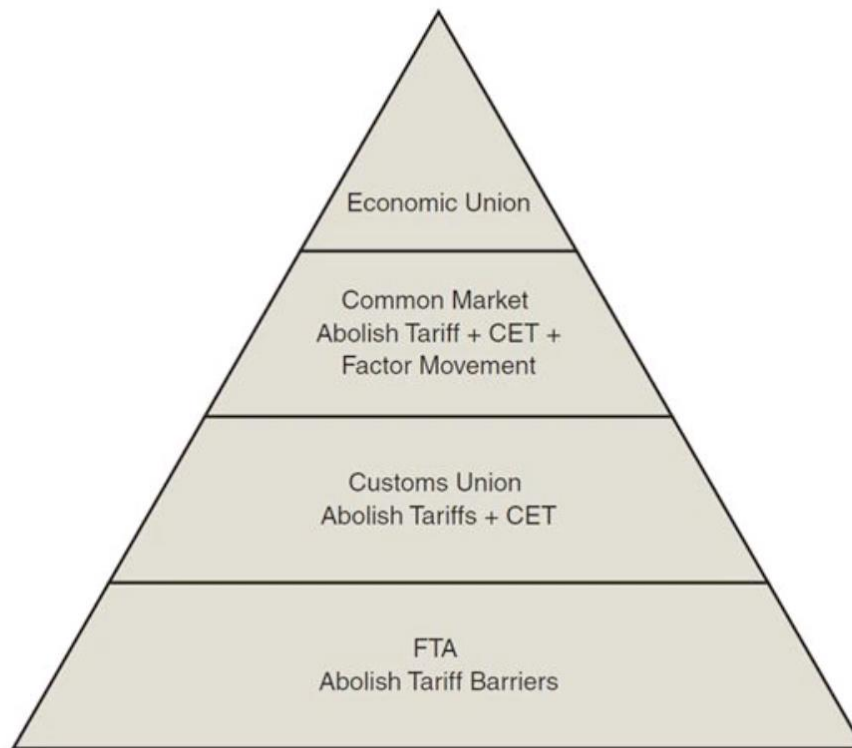

A country's currency is overvalued if Big Mac price (converted to dollars) is higher than US price and vice versa.

- *Economic Exposure* reflects the impact of currency fluctuations on a company's financial performance. (Solutions- Forward markets, hedging, call and put options etc.)

Therefore, dynamics of international finance can have a significant impact on a global companies

5) International Trade Alliances

Economic Integration

CET = Common External Tariffs

Eg: European Union

Eg: Caribbean Community and
Common Market (CARICOM)

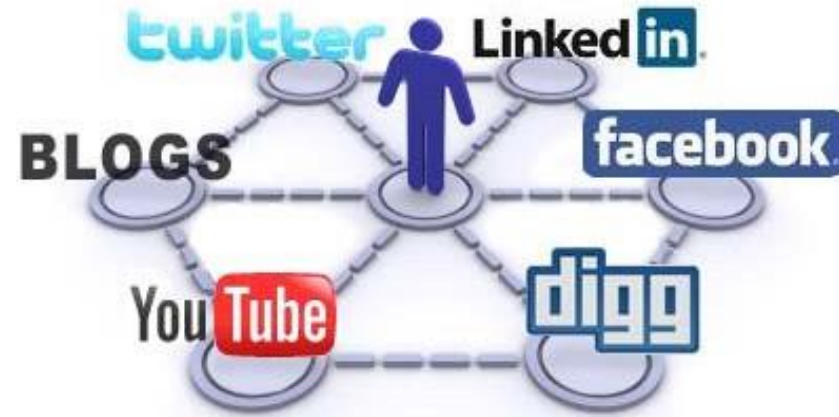

Eg: The ADEAN Community, Central
American Integration System (SICA)
etc.

Eg: NAFTA, SAFTA, Chile and Canada

Degrees of International Economic Integration

Stage of Integration	Abolition of Tariffs and Quotas	Common Tariff and Quota System	Removal of restrictions on factor movements	Harmonization of Economic, Social and Regulatory Policies
Free Trade Area	Yes	No	No	No
Customs Union	Yes	Yes	No	No
Common Market	Yes	Yes	Yes	No
Economic Union	Yes	Yes	Yes	Yes

- Thank you.

Social Media Marketing

By Poornima Gamage

Department of International Business

University of Colombo

Learning Outcomes

- At the end of the lesson, students should be able to,
 - 1) Define social media and social media marketing
 - 2) Identify the history of SMM
 - 3) Explain the key reasons for Social Media Marketing
 - 4) Discuss creation of a SMM strategy
 - 5) Explain advantages of SMM
 - 6) Describe disadvantages of SMM

1) Social Media

- Traditional media, such as television, newspapers, radio, and magazines, are one-way, static broadcast technologies. If you disagree with something you read in the newspaper, you can't send the editorial staff instant feedback.
- Social Media is a whole network of sites where users can interact with one another whether it is by sharing information or discussing various topics

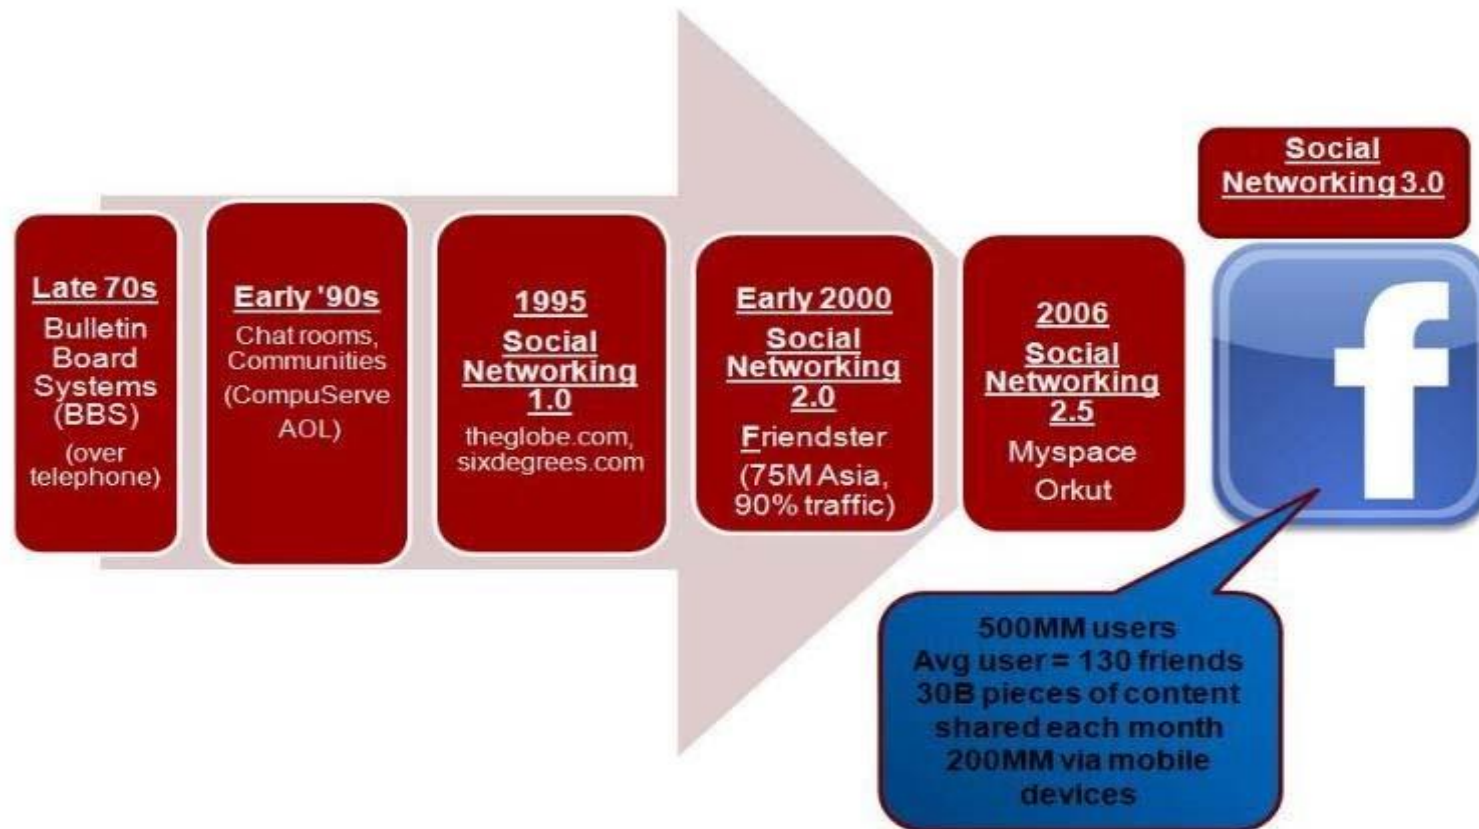

1) Social Media Marketing

- Digital marketing strategies that use social media platforms to market brand and products to potential clients are known as social media marketing strategies.
- Social Media Marketing is *The process of promoting business or websites through social media channels*
- Despite what many people think, it is considerably more than just posting sporadic updates on business accounts. Planning and strategy are essential for a social media marketing campaign to be successful.

Big Brands and Social Media

- Burger King has made headlines time and time again with its innovative viral and social marketing campaigns, most recently with the “Whopper Sacrifice”
- <https://www.instagram.com/reel/DL5GJKmyAGq/?hl=en>

2) History of Social Media

Active Worldwide Users

3) Key reasons for Social Media Marketing

- 1) The ‘engagement’ factor- “Social Media is an excellent point of initial engagement with consumers – essentially the first step in a purchase process.”Michael Orpen
- 2) The ‘word-of-mouth’ factor - 78% of people trust recommendations of other consumers. While only 14% of people trust tv and radio advertisements. (Source: Nielsen report “Trust in advertising”)
- 3) The ‘Gen-Y’ factor- Technology is the major influencer of Generation Y’s buying behavior. It influences how they find and compare products, as well as how they get their products.”~Angela Hughes,

Dell's Success in using Twitter

- Fast to adopt (2007)
- Segmentated users
- Created special offering for each of its segments
- Created a community and build a trust factor
- Targeted 'Sales messages' to the community
- By the end of 2009, Dell had generated 6.5 million in sales from twitter alone.

Say goodbye to the era

4) Basic SMM Strategy

- Social media technologies (Facebook, linkedin, Instagram etc) consistently changes all the time and your SMM strategy should never start with the technology part of it. The POST method is an excellent starting point for any SMM Campaign.
- The POST method stands for “People, Objectives, Strategy, and Technolog”, and this method helps to address the burning question of “ should my company have a social media marketing strategy”?

POST method

- People: do you know who your target audience is? What are their demographics and interests?
- Objectives: what do you want to accomplish with your social media marketing campaign?
- Strategy: how will things be different after you launch your social media marketing campaign?
- Technology: what social media channels are you going to use?

1) POST method - People

- This means identifying who you want to reach through social media — their age, gender, location, lifestyle, and interests.

Example: Nike

Nike's target audience is young people aged 18–35 who are interested in sports, fitness, and fashion.

- They follow fitness influencers, wear athletic clothes daily, and use Instagram and YouTube often.
- Nike's content — motivational videos, athlete stories, and workout tips — appeals directly to this group.

Nike

- **Target Audience:** Athletes and fitness enthusiasts aged 18–40.
- **Demographics:** Global audience, both men and women, middle to upper income.
- **Interests:** Sports, fashion, fitness, motivation, and performance improvement.
- **Behavior:** Active on Instagram, YouTube, and TikTok; enjoy motivational stories and fitness challenges.

Why it works: Nike creates emotional, inclusive campaigns (like “*You Can’t Stop Us*”) that resonate with people’s drive for self-improvement — not just sports.

- <https://www.youtube.com/watch?v=pcXTnyCmQbg&t=73s>

2) POST method - Objectives

- This means deciding what your **goals** are. Do you want more followers, more sales, or better engagement?

Your goals should be **SMART**: Specific, Measurable, Achievable, Relevant, and Time-bound.

Example: Starbucks

Starbucks wanted to increase engagement and brand loyalty.

- Objective: Get customers to share their holiday cup photos online.
- Campaign: They launched #RedCupContest on Instagram.
- Result: Thousands of customers posted pictures, giving Starbucks free advertising and building emotional connections with the brand.

Starbucks

- Objective: Strengthen customer loyalty and engagement.
- SMART Goal: Increase user-generated content by 25% over 6 months.
- Tactics: Encourage customers to post photos with seasonal drinks using the hashtag #RedCupContest.

Outcome: Thousands of customers participated, generating free publicity and deepening emotional connections with the brand

3) POST method - Strategy

- Strategy is about deciding how your campaign will make a difference and what your message will be.

Example: Dove

Before its “*Real Beauty*” campaign, Dove was seen as a regular beauty brand.

- Strategy: Show real women with different shapes, colors, and sizes instead of models.
- Message: “You are beautiful just the way you are.”
- Result: Millions of women felt represented and shared the campaign. Dove’s image transformed into one that promotes self-confidence and inclusivity.

Dove

- Before Campaign: Known mainly for selling beauty and skincare products.
- After Campaign: Recognized for empowering women and promoting self-esteem.
- Strategy: The “*Real Beauty*”/ #choosebeautiful campaign highlighted real women instead of models, using authentic stories and emotional storytelling.
- Result: Dove shifted its brand image, gained millions of followers, and sparked global conversations about body positivity.
- <https://www.youtube.com/watch?v=UjJALzZ24H0>

4) POST method - Technology

Choosing Platforms and Tools

- This step focuses on selecting the best social media channels and tools to post, analyze, and improve your campaign.

Example: Airbnb

Airbnb's audience is global travelers who love real, local experiences.

- Platforms: Instagram, Facebook, YouTube.
- Tools: Uses Canva for visuals, Sprout Social for scheduling, and Google Analytics to track performance.
- Content: Shares traveler photos and videos — not ads — showing real experiences in real homes.
- Result: Builds trust and community; people feel inspired to travel and use Airbnb.

Example: Airbnb

- Platforms: Instagram, Facebook, YouTube, and X (Twitter).
- Tools Used:
 - Canva & Photoshop for content design.
 - Sprout Social for scheduling and analytics.
 - Google Analytics to track web traffic from social media.
- Approach: Airbnb shares user-generated photos of stays and experiences, showcasing authentic travel moments.

Result: Built a community of loyal travelers who trust peer experiences more than traditional ads.

5) Social Media Marketing's Advantages

- **Incorporate Humans into Company:** There is a scope to communicate with both existing and potential clients through social media channels. It is also possible to “humanize brand” and establish a stronger bond with audience if employ them effectively.
- **Produce Leads:** Social media to produce leads and conversions with features like call-to-action buttons, Facebook and Instagram shops, and direct messaging. Increasing leads and conversions is a sure fire method to boost sales.
- **Raise Brand Awareness:** Social media marketing is a great way for small and start-up businesses to showcase their brands. It can help to clarify how each product and brand is different from rivals
- **Develop Relationships:** If want to keep clients around the companies for the long term, there is a need to develop relationships with them. In this regard social media playing a vital role

6) Social Media Marketing's Disadvantages

- Social media facilitates consumer communication, but it also gives users a forum to publicly air their concerns and complaints. This can have the unforeseen result of social media
- This may unintentionally create a public forum, which, if handled improperly, could harm a company's reputation.
- It could be challenging to comprehend the return on investment from social media marketing. It can be difficult to gauge the success and return on investment of social media marketing.
- Social media companies frequently alter their policies and algorithms, which can make it challenging to forecast and sustain success

Group Activity

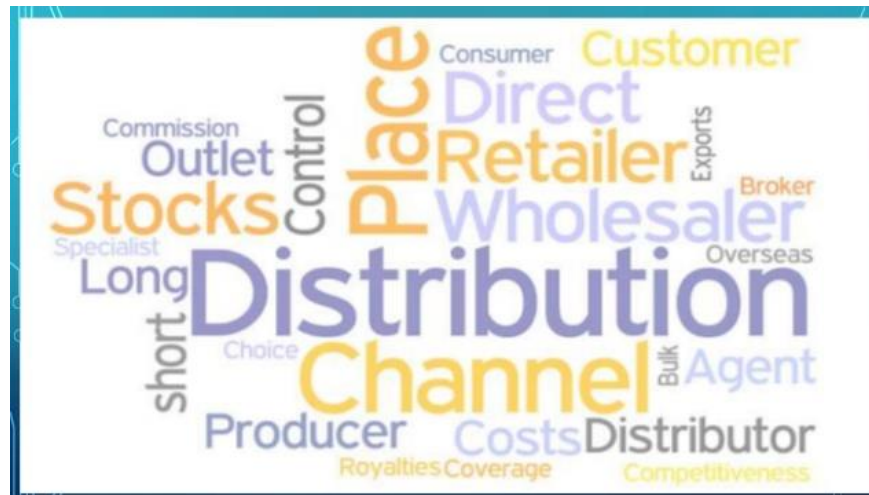

- Exploring Social Media Marketing Strategies

Each group selects (or is assigned) one company from local or international.

- Each group researches how their company designs its SMM plan based on the four key elements
- Each group presents their findings to the class using a poster

Thank you!

Global Marketing Channels and Physical Distribution

Channel Objectives

- Marketing channels exist to create utility for customers
 - **Place utility** - availability of a product or service in a location that is convenient to a potential customer
 - **Time utility** - availability of a product or service when desired by a customer
 - **Form utility** - availability of the product processed, prepared, in proper condition and/or ready to use
 - **Information utility** - availability of answers to questions and general communication about useful product features and benefits

Distribution Channels: Terminology and Structure

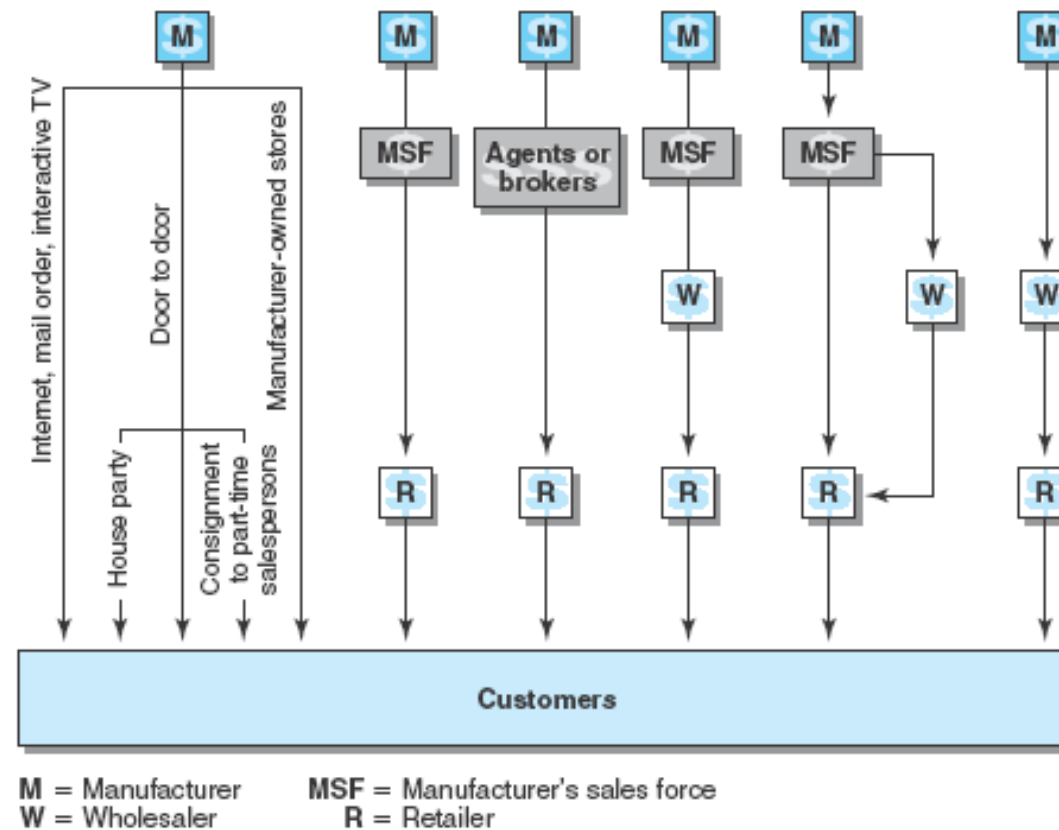

- Distribution is the physical flow of goods through channels
- Channels are made up of a coordinated group of individuals or firms that perform functions that add utility to a product or service

Distribution Channels: Terminology and Structure

- **Distributor** – wholesale intermediary that typically carries product lines or brands on a selective basis
- **Agent** – an intermediary who negotiates transactions between two or more parties but does not take title to the goods being purchased or sold

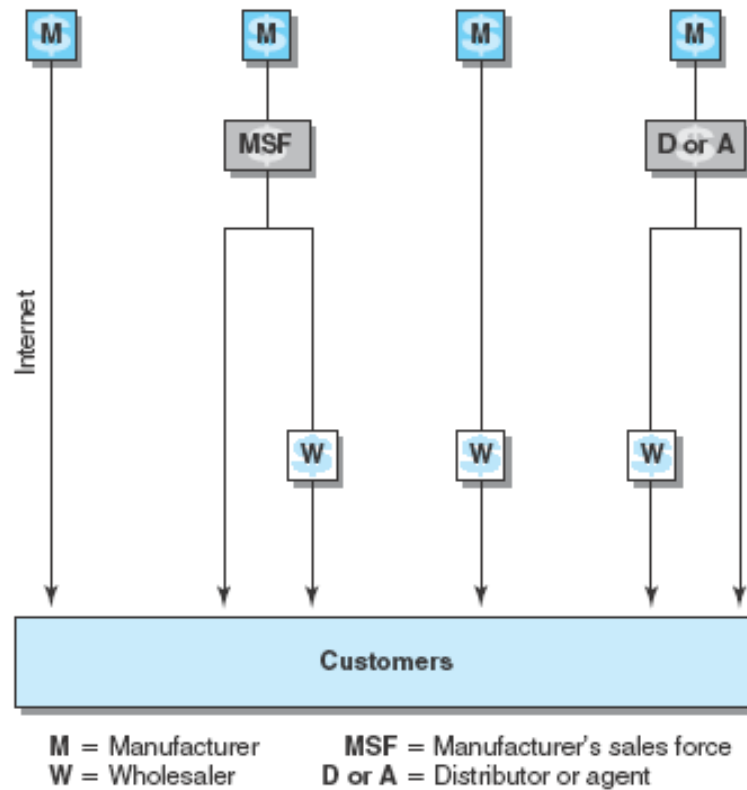

Consumer Products

Consumer Products

- Piggyback Marketing
 - Channel innovation that has grown in popularity
 - One manufacture distributes product by utilizing another company's distribution channel
 - Requires that the combined product lines be complementary and appeal to the same customer

Industrial Products

Establishing Channels

- Direct involvement – the company establishes its own sales force or operates its own retail stores
- Indirect involvement – the company utilizes independent agents, distributors, and/or wholesalers
- Channel strategy must fit the company's competitive position and marketing objectives within each national market

Working with Channel Intermediaries

- Select distributors – don't let them select you
- Look for distributors capable of developing markets, rather than those with a few good customer contacts
- Treat local distributors as long-term partners, not temporary market-entry vehicles

Working with Channel Intermediaries

- Support market entry by committing money, managers, and proven marketing ideas
- From the start, maintain control over marketing strategy
- Make sure distributors provide you with detailed market and financial performance data
- Build links among national distributors at the earliest opportunity

Global Retailing

- Department stores
- Specialty retailers
- Supermarkets
- Convenience stores
- Discount stores and warehouse clubs
- Hypermarkets
- Category killers
- Outlet stores

Global Retailing

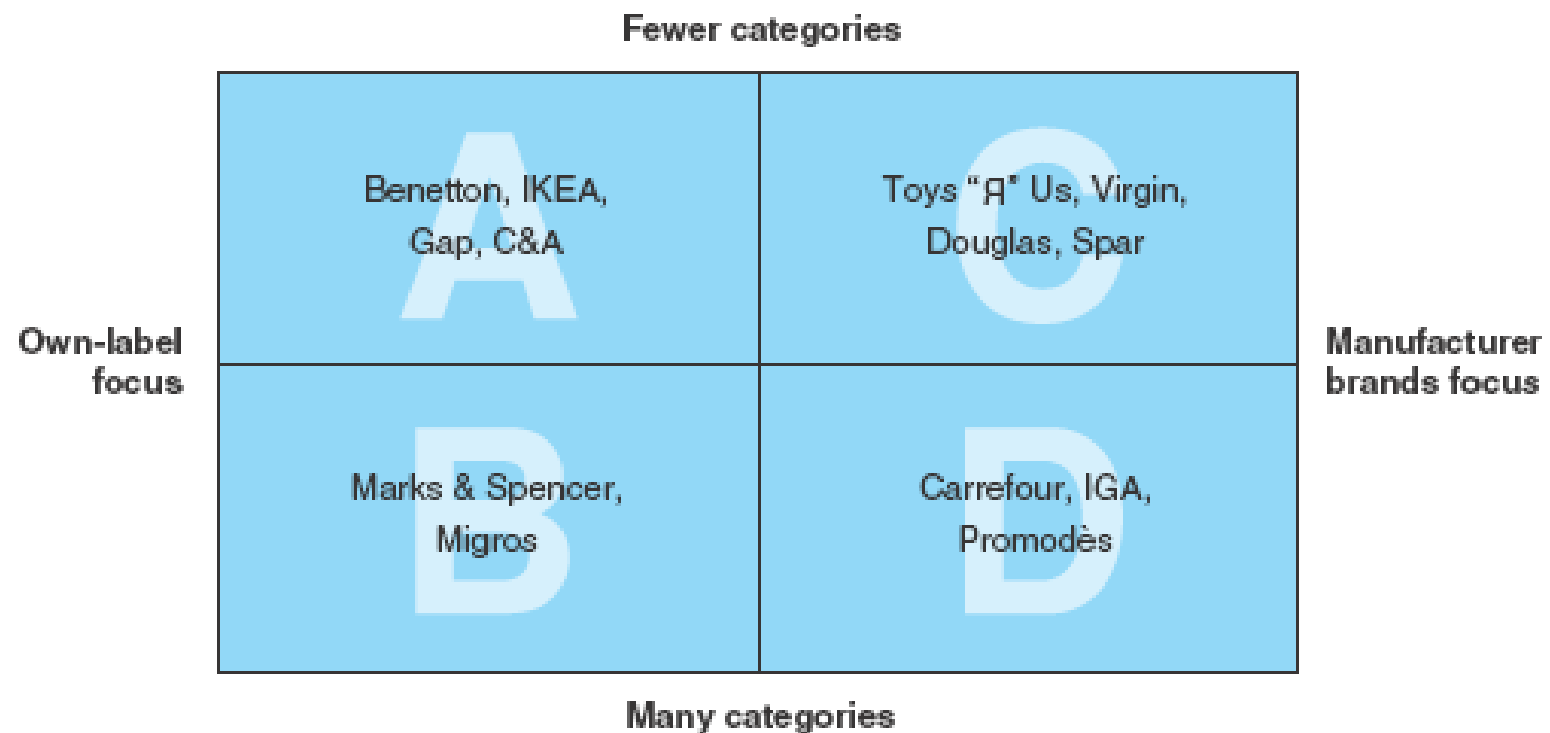

Rank	Company	Country	Brand Value (\$M)	% Change vs 2018
1	Amazon	USA	315,505	+52%
2	Alibaba	China	131,246	+16%
3	The Home Depot	USA	53,507	+13%
4	Walmart	USA	36,801	+8%
5	Costco	USA	21,282	+17%
6	JD	China	20,609	-2%
7	IKEA	Sweden	18,949	+8%
8	Lowe's	USA	14,964	+14%
9	ALDI	Germany	14,692	+7%
10	<u>Ebay</u>	USA	11,511	-22%

Top 10 Global
Retailers in
2019

Global Retailing

- Environmental Factors
 - Saturation in the home country market
 - Recession or other economic factors
 - Strict regulation on store development
 - High operating costs
- Critical Question
 - What advantages do we have relative to the local competition?

Classifying Global Retailers

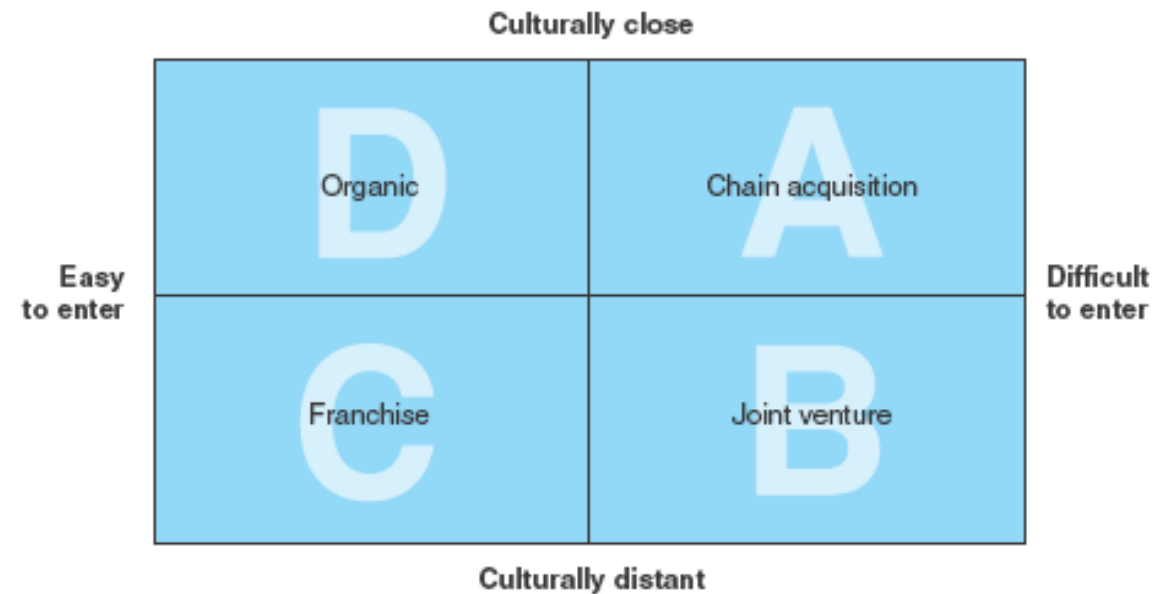

Global Retailing Strategies

- Organic
 - Company uses its own resources to open a store on a green field site or acquire one or more existing retail facilities
- Franchise
 - Appropriate strategy when barriers to entry are low yet the market is culturally distant in terms of consumer behavior or retailing structures

Global Retailing Strategies

- Chain Acquisition
 - A market entry strategy that entails purchasing a company with multiple existing outlets in a foreign country
- Joint Venture
 - This strategy is advisable when culturally distant, difficult-to-enter markets are targeted

Global Retailing Strategies

Supply Chain Definitions

- Supply Chain
 - Includes all the firms that perform support activities by generating raw materials, converting them into components or finished products and making them available to customers
- Logistics
 - The management process that integrates the activities of all companies to ensure an efficient flow of goods through the supply chain

Physical Distribution, Supply Chains, and Logistics Management

- Order Processing
 - includes order entry in which the order is actually entered into a company's information system; order handling, which involves locating, assembling, and moving products into distribution; and order delivery
- Warehousing
 - Warehouses are used to store goods until they are sold
 - **Distribution centers** are designed to efficiently receive goods from suppliers and then fill orders for individual stores or customers

Physical Distribution, Supply Chains, and Logistics Management

- Inventory Management
 - Ensures that a company neither runs out of manufacturing components or finished goods nor incurs the expense and risk of carrying excessive stocks of these items.
- Transportation
 - the method or mode a company should utilize when moving products through domestic and global channels; the most common modes of transportation are rail, truck, air, and water

Transportation

Mode	Reliability	Cost	Speed	Accessibility	Capability	Ease of tracing
Rail	average	average	average	average	high	low
Water	low	low	slow	low	high	low
Truck	high	varies	fast	high	high	high
Air	high	high	fast	low	moderate	high
Pipeline	high	low	slow	low	low	moderate
Internet	high	low	moderate to fast	moderate; increasing	low	high

- Channel Strategy – analyzing each shipping mode to determine which mode, or combination of modes, will be both effective and efficient in a given situation

you!*

Global Market Research

Ms. Methma Karunaratne

Learning Objectives

- ✓ Understand the purpose and scope of global market research.
- ✓ Learn methods and tools used in conducting global market research.
- ✓ Recognize challenges in data collection, cultural adaptation, and analysis.
- ✓ Apply research insights to decision-making in global market entry and expansion.

What is Market Research?

- The action or activity of gathering information about consumers' needs and preferences.

What is global market research?

- Global market research is the process of gathering, analyzing, and interpreting information about international markets and consumers to support business decisions.
- It helps companies understand the broader global landscape, identify potential opportunities and challenges, and tailor their products and strategies to different cultural contexts.
- Usually, MNCs engage in global market research before entering a new market or introduce a new product.

Why should a global organization carry out market research?

➤ To understand diverse customer needs

- Global markets have varying preferences, cultural nuances, and purchasing behaviors. Market research helps identify these differences, allowing businesses to tailor products, services, and marketing messages accordingly.
- For example, a company launching a new food product needs to understand dietary restrictions, religious observances, and local tastes in each region to succeed.

➤ To adapt strategies for different regions

- Market research informs strategic decisions, such as pricing, distribution channels, and marketing campaigns, to resonate with local markets.
- A clothing retailer, for example, needs to research the preferred styles, sizes, and price points in each country before launching a new line.

➤ To identify new opportunities

- Market research can reveal unmet needs, emerging trends, and untapped customer segments that a global organization can capitalize on.
- By analyzing market data, a software company might discover a new niche for its product in a developing country.

➤ To mitigate risks

- Entering a new market without understanding the competitive landscape, regulatory environment, and consumer behavior can lead to costly mistakes.
- Market research helps identify potential risks, such as legal restrictions, cultural insensitivity, or strong competition, allowing businesses to develop mitigation strategies.

➤ To improve customer satisfaction and loyalty

- Understanding customer preferences and pain points through market research helps businesses improve their products, services, and overall customer experience.
- This leads to increased customer satisfaction, loyalty, and positive word-of-mouth, which are crucial for long-term success.

➤ To stay ahead of the competition

- Market research allows organizations to monitor competitor activities, identify their strengths and weaknesses, and develop strategies to outperform them.
- By understanding competitor strategies, a business can adapt its own offerings and marketing efforts to gain a competitive advantage.

How to conduct
Market
Research?

```
graph TD; A[How to conduct Market Research?] --> B[Using in-house resources]; A --> C[Outsource to a firm specializing in marketing research];
```

The diagram is a simple flowchart. At the top is a box with the question 'How to conduct Market Research?'. A line from the bottom of this box splits into two lines, each leading to a box below. The left box is 'Using in-house resources' and the right box is 'Outsource to a firm specializing in marketing research'.

Using in-house resources

Outsource to a firm specializing in
marketing research

Market Research Companies

The research process

- ✓ Problem definition and development of research objectives
- ✓ Determine the sources of information
- ✓ Collection of data form primary and secondary sources
- ✓ Analysis of data
- ✓ Making product and marketing related decisions based on gathered information

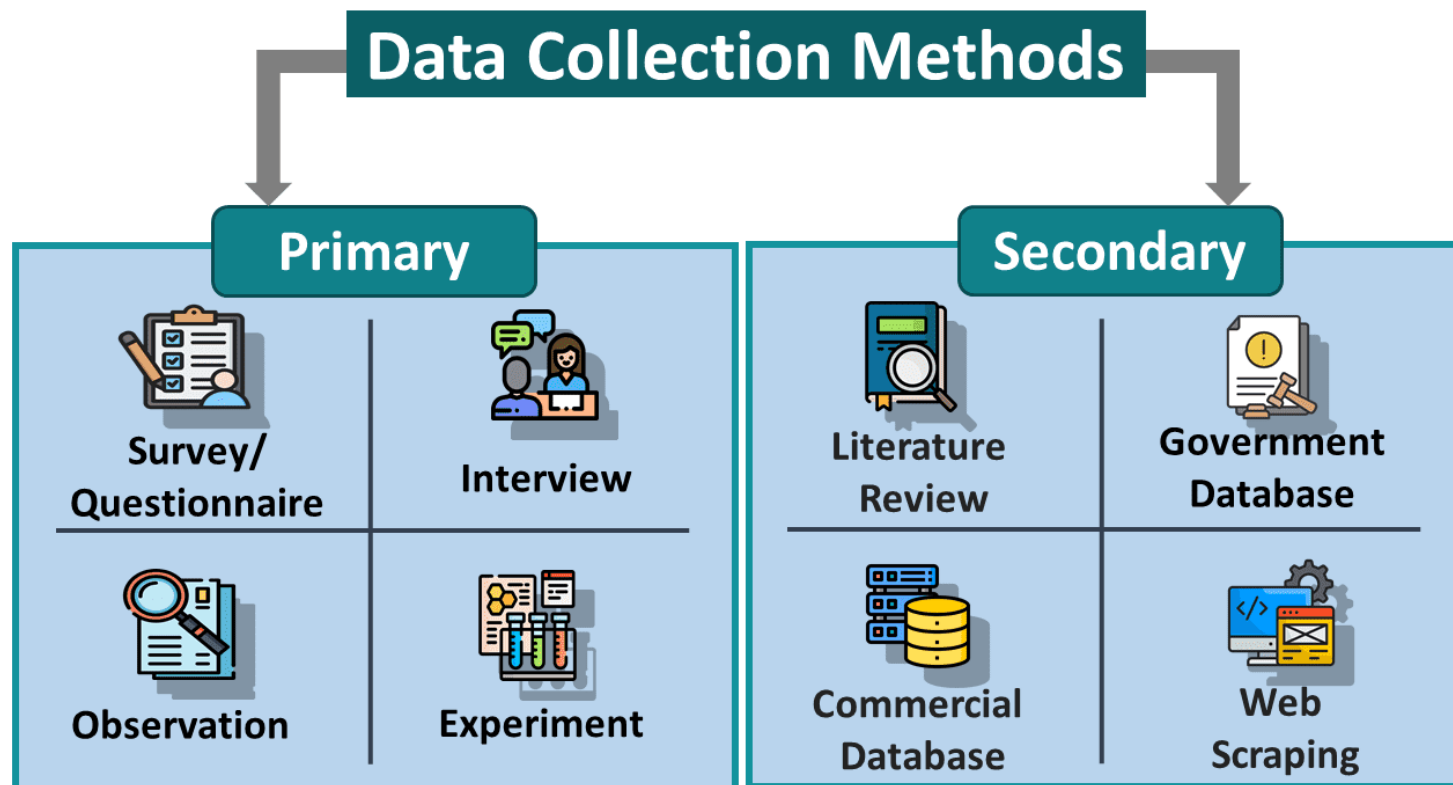

1. Identifying the Research Problem

- “A problem well defined is a problem half solved”.
- Whether it’s a weakness in the competitor’s product or identify an unserved market segment.

Bata

2. Data collection methods

3. Analyzing research data

- Quantitative Analysis (Descriptive Statistics, Regression Analysis)
- Qualitative Analysis (Thematic Analysis)
- Demand pattern analysis
- Income Elasticity measurements

4. Making decisions

- The research team can present the findings of the research to the Management team either via a report, presentation or electronically.
- Findings should be easily understandable to the managers – Research jargons and complex quantitative analysis should be kept away in the report.
- Results should be clearly stated and provide a basis for managerial decision making.

Challenges in Global Market Research

- A global market researcher must analyse many national markets.
- Language and translation issues (back-translation, idioms)
- Cultural bias and ethnocentrism
- Political, economic, and legal factors
- Technological infrastructure differences
- Managing ROI in market research
- Headquarters control global marketing research
- Ethical considerations (e.g., data privacy laws like GDPR)

Example: Misinterpretation of Pepsi's slogan in China ("Pepsi brings your ancestors back from the dead").

Emerging Trends in Global Market Research

- Use of AI and big data in global insights
- Mobile and digital-first research in developing markets
- Cross-cultural segmentation
- Sustainability and ethical consumption trends globally

A soft, pink watercolor splash with a textured, painterly appearance, featuring various shades of pink and subtle white speckles. It is centered on a plain white background.
